Save Incubator Space with Benchtop Incubating Rocking and Waving Shakers

OHAUS Incubating Rocking and Waving Shakers are designed to incubate samples from 5°C above ambient to 65°C to provide accurate and repeatable results. Rocking shakers provide a see-saw like motion, while waving shakers offer a smooth, low-foaming three-dimensional “wave” motion. All models feature LED displays with touchpad controls. Both models include safety features that protect both the user and samples.

Standard Features:

- **Independent LEDs and Touchpad Control for Temperature, Speed/Tilt Angle and Time**
Equipped with LED displays and touchpad controls for temperature, speed/tilt angle and time. Timer will display elapsed time or when programmed to a set time, will turn off when time reaches zero.
- **Microprocessor with PID Temperature Control**
Microprocessor control provides electronic tilt angle adjustment, allowing easy adjustment in 1° increments for tilt and 1 rpm for speed while unit is running. PID controller for precise temperature control.
- **Safety Features Include Speed Ramping and Overload Protection**
Units slowly increase speed to desired setpoint to avoid splashing, and feature overload protection. Audible and visual signals will activate when system detects an obstruction or overload of the tray.
